GNV34DB2 34-Inch Ultrawide Gaming Monitor

LIGHTNING-FAST 100Hz

Flicker-free video. Buttery smooth transitions. Zero dropped frames. Twice as fast as the standard monitor.

ULTRAWIDE QHD

A 21:9 widescreen VA panel with 3440x1440p resolution delivers 2.5 times more pixels than full-HD.

MEDIA POWERHOUSE

Color-rich images that are ultra-bright, extra crisp and razor-sharp. Binges or battles, you'll enjoy the best viewing experience possible.

DEEPER, TIGHTER, BETTER

The native 1500R curvature covers more of your field of vision, letting you comfortably see more of your content.

GAME-WINNING FEATURES

Stay on top of the game. Dominate the leaderboards. AMD FreeSync, FPS/RTS display optimization, GAMEPLUS crosshairs. Victory awaits.

ZERO-TOLERANCE DEAD PIXEL

We don't play with dead pixels. Neither will you. Protected by our best-in-class dead pixel policy and 3-Year Guarantee.
