The Bronco 46B lawn tractor from Troy-Bilt is powered by a high-powered 500cc Briggs & Stratton engine. The automatic transmission drives like a car with foot pedal control and provides smooth control of speed and direction. The large 46-in twin blade cutting deck reduces mowing time and comes with an integrated deck wash port to make cleaning the underside of the deck easier. You can easily adjust the cutting height from 1.5-in -3.75-in with the five-position height adjustment lever and reduce lawn turfing with the added support of 2 deck wheels
